

# PORTABLE JAR MIXER

POSITIVE GEAR DRIVE

VARIABLE SPEED AGITATION

DIFFUSED LIGHTING

STURDY-COMPACT-SELF CONTAINED FOR FIELD OR LABORATORY USE

---

- A small gear head motor drives the stainless steel agitators, variable from 6 RPM to 250 RPM via a panel mounted potentiometer (optional digital readout of the paddle speed is available)
  - Diffused lighting emulates from a false bottom via an ON-OFF switch and aids in evaluation of mix samples for clarity, floc particle size, and liquid-solid separation
  - The front panel of the sturdy carrying case is removable for easy access to the agitators and controls
  - The hinged lid stores pipettes and has a heavy duty handle for transporting the Jar Mixer
  - The false bottom supports the 1000 ml mixing beakers and test solutions
  - Includes a 120 VAC 60 Hz GFI protected power supply cord (optional 220 VAC 50/60 Hz available)
  - The Portable Jar Mixer is available in two, four, and six station models
-
